

## Antalya Airport's COVID-19

# Action Plan

## Introduction

The Current pandemic, namely COVID-19, has severely affected the global aviation industry. The dramatic traffic decrease in commercial air transportation had a sudden impact on all players of the sector as well as the airports as being one of the two main pillars of the sector together with airlines. While closely observing the state of pandemic, variety of new measures became necessity at the airports in order to minimize the risk of virus spread and obtain the maximum health and safety levels to assure the Covid-free travel and maintain efficient operations.

## Target

Fraport TAV Antalya Airport is one of the first international airport in Turkey that has been entitled to receive the Pandemic Certification of the Directorate General of Civil Aviation, Turkey. This document briefly addresses all related health and safety measures implemented to enable the efficient restart of aviation operations and maintain the confidence of personnel and travelers in line with the requirements of the certification process. All measures presented are delicately planned, processed and implemented in the premises of our terminals which also cover the most up-to-date instructions of civil aviation organizations and authorities worldwide.

**The Health and Safety Measures have been implemented in order to:**

Ensure safe and secure  
travel at the airport

Safeguard health & well-being of  
both passengers & airport users

Audio-visual safety awareness messages displayed to remind passengers about the precautionary measures at the airport.

Passenger routes and all equipment in the terminal disinfected regularly with special methods.

Encourage users to offer available contactless payment methods.

Mandatory Social Distancing.

Personnel and passenger contact minimized with plexiglas barriers.

Hand sanitizers are available for passengers throughout the terminal.

Fresh air circulation enhanced in all indoor areas.

Mandatory Thermal Screening to all passengers & personnel.

Obligatory usage of masks at the entrance of Terminal. Disposal bins for used PPE.

Obligatory change of gloves after each body search. Any contact to passenger itineraries, personnel ID cards, etc. minimized.

Elevator usage limitation according to social distancing regulation.

**PPE (Personal Protective Equipment):** PPE (masks, gloves, face shields etc.) used by personnel.

**Social Distancing:** All measures taken to ensure the social distancing at all premises of the terminal.

**Queue Management:** Reconfiguration of queue lines, enforcing social distance.

**Plexiglas Protective Shield:** Personnel and passenger contact minimized with plexiglas barriers.

**Thermal Screening:** Mandatory thermal screening and secondary temperature control procedure by handheld digital infrared thermometers.

**Contactless Facilities:** Contactless payment and online check-in encouraged to minimize the touch points.

**Disinfection:** Regular and frequent disinfection of facilities, terminal areas, staff offices and equipment to minimize the risk of the infection.

**Signage & Awareness:** Create awareness of precautionary measures against the spread of virus through signage, commercial boards, stickers, screens and ground floor markings.

**Cleaning & Disinfection** : Regular and frequent disinfection of facilities, terminal areas and staff offices, and equipment to minimize the risk of the infection.
